

Success story

About: Nordic parking operator

Founded: 1959

Focus: Integrated parking and EV charging solutions for residential, corporate, and public spaces

Aimo Park and eMabler: Revolutionizing the Nordic Parking & EV Charging Landscape

Aimo Park, one of the leading parking operators in the Nordic region, is reshaping urban mobility by seamlessly integrating electric vehicle (EV) charging into its core services. With operations across Sweden, Norway, and Finland, Aimo Park combines sustainability and convenience, offering users a unified experience to park and charge effortlessly.

To meet the growing demand for EV charging infrastructure and overcome operational hurdles, Aimo Park partnered with eMabler, an open EV charging platform recognized for its flexibility and scalability. This collaboration empowers Aimo Park to unify systems, scale its operations, and enhance customer satisfaction.

A Unified Solution for Growth and Efficiency

Aimo Park identified key areas to enhance its EV charging operations, focusing on solutions that would:

- ◆ Integrate diverse charger brands into a single, unified system.
- ◆ Simplify operations with efficient tools for charger management.
- ◆ Deliver a seamless experience by combining parking and charging into one platform

By partnering with eMabler, Aimo Park adopted a flexible, API-driven platform that simplifies operations and supports its growth ambitions.

The collaboration has streamlined processes, unified systems, and empowered Aimo Park to offer a smooth, user-friendly experience for both customers and property partners.

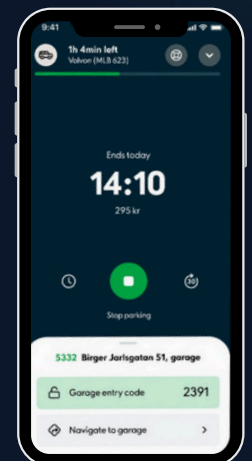

“The ability to unify parking and charging into a single app has been a game-changer for both our customers and our landlords. It simplifies operations and provides a smoother experience for everyone involved.”

- **Victor Lindwall**, Head of Aimo Charge

Seamless Parking and Charging

The Aimo Park app transforms urban mobility by offering users a unified platform to park and charge effortlessly. Key benefits include:

- A smoother, more intuitive experience for EV drivers.
- Simplified charger management for landlords and property owners.
- Scalability for future growth, including dynamic pricing and energy optimization.

Scaling Operations with Flexibility

Aimo Park’s collaboration with eMabler has redefined their EV charging operations, delivering the flexibility to integrate diverse charger systems while scaling efficiently. By consolidating hardware and tools into one platform, Aimo Park has reduced operational complexities, streamlined processes, and improved outcomes for both property partners and drivers.

Innovating for the Future of Mobility

With eMabler’s advanced features, Aimo Park is future-proofing its EV charging network. Tools like Dynamic Load Management optimize energy use across mixed-use sites, while simplified bulk operations save time and resources. Combined with actionable real-time insights, Aimo Park is equipped to grow its network, anticipate user needs, and lead sustainable urban mobility in the Nordic region.

Growth with eMabler

- Thousands of chargers integrated into one unified system.
- Significant operational efficiency with API-driven tools.
- Growing scalability across residential, corporate, and public spaces.
- Enhanced user satisfaction powered by a seamless app experience.
