

ANEO

Success story

About: Norwegian EV charging provider
Founded: 2019
Focus: Private charging
With eMabler since: 2022

Aneo Mobility & eMabler: Leading Norway's EV Charging for Housing Associations

As Norway's largest supplier of EV charging solutions for housing associations, Aneo Mobility is transforming sustainable living. By delivering tailored services for private customers, Aneo ensures EV charging is both reliable and accessible, meeting the needs of housing associations and condominiums across the country.

Since partnering with eMabler in 2022, Aneo Mobility has strengthened its operations by transitioning to a future-ready platform. This seamless migration has set a new standard for operational efficiency, empowering Aneo Mobility to scale their charging infrastructure while keeping the customer experience effortless.

Built for the Future of EV Charging

Aneo Mobility's growing customer base requires adaptable solutions that integrate seamlessly with their existing operations. eMabler's flexible platform enables Aneo to manage a robust, scalable charging network while offering housing associations the reliable service they need.

By focusing on flexibility and efficiency, Aneo Mobility has been able to accelerate growth, achieving an impressive 138% year-on-year increase. This partnership exemplifies how customer-first innovation can drive success in the evolving EV charging landscape.

ANEO

eMabler migration has performed solidly above our pre-launch expectations. We're happy with the flexibility and accessibility of the eMabler team and look forward to continuing our partnership.

- **Mari Moxnes Karlsen**,
CPO, Aneo Mobility

Seamless Migration

eMabler's expertise ensured that Aneo Mobility's backend migration was smooth and non-disruptive. By designing a bridge-gap API service, eMabler enabled seamless operations during the transition, with minimal bugs post-launch. This attention to detail has helped Aneo maintain reliable service while setting the stage for future growth.

Scaling for the Future

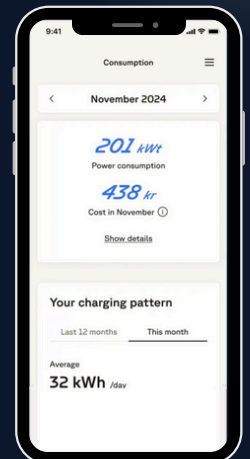

With eMabler's Open EV Charging Platform, Aneo Mobility adapts to changing market demands. The scalable backend supports new integrations, keeping Aneo ahead as Norway's largest private EV charging provider. This collaboration simplifies complexity and drives sustainable innovation..

Aneo Mobility's EV charging solutions are empowering housing associations across Norway to embrace sustainable living.

Transparency and Insights for Users

With eMabler powering the backend, Aneo Mobility offers users real-time insights into their charging sessions. From energy consumption to charging patterns, this transparency ensures a user-friendly and data-driven experience.

Growth with eMabler

- Seamless backend migration with minimal disruptions
- 138% year-on-year growth in EV charging operations
- Scalable platform tailored to housing association needs
- Enhanced operational efficiency with real-time reporting
