

DESTIA

A COLAS COMPANY

Success story

About: Finnish infrastructure service provider

Founded: 2007

Focus on eMobility: B2B fleet charging

With eMabler since: 2021

Destia & eMabler: Powering Finland's B2B Fleet Charging Revolution

Destia, Finland's largest infrastructure service company and part of the global Colas Group, is at the forefront of building sustainable urban environments. With expertise spanning roads, electrical networks, and smart mobility solutions, Destia is driving Finland's transition to a greener future.

To revolutionize fleet charging for B2B customers, Destia partnered with eMabler in 2021. This collaboration uses eMabler's advanced platform to provide scalable, efficient, and future-proof EV charging solutions for diverse fleets, including buses, taxis, and delivery services.

A Platform Tailored for Innovation and Growth

To meet the demands of an evolving EV landscape, Destia required a modular platform capable of integrating with its existing systems. eMabler's hardware-agnostic solution provided unmatched compatibility with chargers ranging from 11kW to 450kW, ensuring adaptability and scalability.

With effortless system compatibility, across energy management systems, Destia has optimized its charging infrastructure for operational efficiency and reliability. This tailored approach has strengthened Destia's ability to support Finland's transition to electric mobility.

We are pleased to cooperate with eMabler. eMabler's solution enables Destia to offer total solutions for various customers, including site surveys, planning, commissioning and efficient remote operation of electric vehicle charging network.

- **Jere Jokinen**, Head of EV Charging Solutions at Destia Oy

Streamlining B2B Fleet Operations

eMabler's platform supports Destia's customers with features like automated vehicle identification and remote charger monitoring. These smart solutions simplify fleet management by reducing manual intervention and ensuring seamless operations.

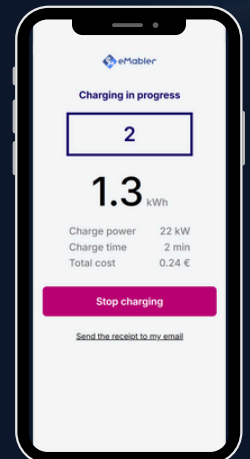

Driving Growth Across Finland

Destia has doubled its B2B fleet charging capacity annually since partnering with eMabler. By serving diverse fleet operators with scalable and reliable solutions, Destia is spearheading the shift toward sustainable mobility in urban environments.

Destia's EV charging network, powered by eMabler, offers flexible, reliable, and future-ready solutions for Finland's B2B fleets.

Empowering Smarter Energy Use

With eMabler's advanced energy controls, Destia can dynamically adjust charging sessions based on real-time energy availability. This ensures cost-efficient operations while optimizing energy use—a critical advantage for high-demand fleets.

Growth with eMabler

- 100% annual growth in fleet charging operations
- Modular platform supporting chargers from 11kW to 450kW
- Seamless integration with legacy systems and smart energy controls
- Advanced tools for real-time monitoring and fleet optimization
