

OPCHARGE

Success story

About: UK-based Charge Point Operator

Founded: 2020

Focus: Scalable EV charging solutions

With eMabler since: 2023

Opcharge & eMabler: Transforming EV Charging Infrastructure Across the UK

Opcharge UK is leading the charge in EV infrastructure with an ambitious goal—deploying 20,000 fully funded public chargers nationwide. As a rapidly growing charge point operator, Opcharge focuses on making EV charging effortless, scalable, and future-proof.

To achieve this vision, Opcharge partnered with eMabler in 2023, leveraging its open platform to integrate various charging hardware and streamline operations. This collaboration enhances flexibility, accelerates network growth, and ensures a seamless charging experience for businesses and drivers alike.

Scalable, Hardware-Agnostic Charging Solutions

Opcharge required a platform that supports both new installations and the migration of legacy chargers. eMabler's hardware-agnostic approach enables smooth integration, ensuring compatibility across different charging brands.

With simplified operations and real-time energy management, Opcharge can expand its network efficiently while maintaining high service reliability. This flexibility has been instrumental in unlocking new business models and revenue streams.

Our partnership with eMabler has empowered us to deliver an unparalleled combination of cost-effective and rapid solutions for our clients.

Seamless Fleet and Parking Integrations

Opcharge and eMabler streamline fleet and parking management by automating charging operations. This eliminates manual processes, improves space utilization, and enhances efficiency for businesses.

Scaling Up EV Charging Nationwide

In one year, Opcharge secured 1,000+ charging sockets, with 100 already live. eMabler's platform accelerates deployment while ensuring reliability. Integrated energy management optimizes power distribution, making scaling easier for businesses.

Opcharge and eMabler are shaping the future of EV charging by combining flexibility, smart integrations, and nationwide scalability.

Enhancing Business Flexibility

With eMabler's APIs, Opcharge automates data integration for ESG reporting, fleet management, and compliance. This streamlines processes, reduces operational costs, and supports long-term growth in a competitive EV market.

Growth with eMabler

- 100+ charging sockets live, 1,000+ secured in year one
- Modular platform supporting seamless charger integration
- API-driven automation for business system connectivity
- Scalable solutions tailored for urban and destination charging
